

# Slippage among the Experts

## Agency Costs in Partisan Election Regulation

Federico Estévez<sup>1</sup>   Eric Magar<sup>1</sup>   Guillermo Rosas<sup>2</sup>

<sup>1</sup>ITAM, Mexico City

<sup>2</sup>Wash. U., St. Louis

6/25/22

Mat McCubbins Memorial Conference, UCSD

Before: Party watchdog model, congressional parties delegate

- Expect party segmentation of IFE's Council General
- Ideal point estimation confirms

Now: Longitudinal approach to study councilor drift  
1996–2014

- Still exploratory
- New puzzles emerge

- Nine-member, non-partisan regulatory board
- Ran federal elections nationwide 1997–2012
- Congress appoints members by super-majority for 7-year terms
- Public roll call votes
- Upgraded in 2014 to also regulate subnational races (INE)

PRI (later others) conceded,  
how did IFE achieve this?

- Nine-member, non-partisan regulatory board
- Ran federal elections nationwide 1997–2012
- Congress appoints members by super-majority for 7-year terms
- Public roll call votes
- Upgraded in 2014 to also regulate subnational races (INE)

PRI (later others) conceded,  
**how did IFE achieve this?**

# IFE's success story: conventional arguments

- IFE as *ombudsman* representing citizens directly  
(Eisenstadt 2004, Ackerman 2004)
- Budget and tenure security
- Congressional appointment yet no inevitable bias in experts  
(Schedler 2000, Woldenberg 2008)

Independence + impartiality → citizen trust

## Public opinion

	% trust
Church	72
<b>IFE</b>	<b>67</b>
Army	65
Congress	35
Parties	34

*Reforma* poll May 2005

Congressional parties (principal) structure a referee (agent) that they can influence

High stakes: IFE has authority over every aspect of party life

- voter registration
- allocates TV spots
- redistricting
- campaign finance
- nominations
- who clears subsidy hurdle
- campaign content
- ...

Careful delegation → **party** trust → citizen trust

## Contract design (Kiewiet & McCubbins 1991)

- Screening
  - formally non-partisan
  - super-majority rule
  - party quotas/veto (informal)
- Monitoring
  - party reps in board and committees
  - constant signalling
- Carrots/sticks
  - routine impeachment threats, some took place
  - budget cuts
  - nuclear option (electoral reform)
- Checks and balances
  - split in thirds
  - electoral tribunal

## Contract design (Kiewiet & McCubbins 1991)

EN CIERNES

From <http://reforma.com.mx> 8/29/2007

# Stochastic spatial voting

Vote propensity:  $v_j^* = \text{signal}(x_j - m) + \text{error}$

Voting is sincere:  $v_j = \begin{cases} 1 \text{ ('aye')} & \iff v_j^* \geq 0 \\ 0 \text{ ('nay')} & \text{otherwise} \end{cases}$

Dynamics:  $x_{j,t} \sim N(x_{j,t-1}, \text{slack})$  (cf. Martin&Quinn 2002, also Bonica 2010 [↗](#) )

Small committee: Bayesian estimation via MCMC simulation

Identification [↗](#) Votes [↗](#)

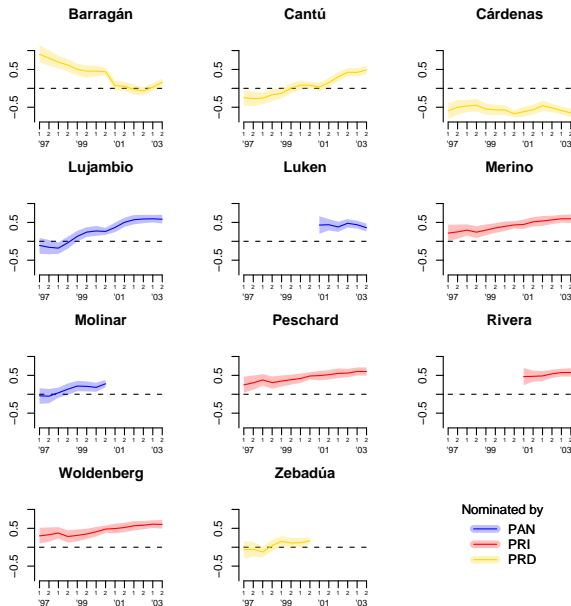

Ideal point summarizes member's voting record vis-à-vis rest,  
proximity = **vote likeness**

- ① Contiguity/superimposition of same-sponsor members
- ② Party segmentation
- ③ Move in tandem
- ④ Gatekeeping: blocking divisive issues brings most together
- ⑤ Vanishing principal: drift should *follow*

## Ugalde: contingente PRI

# Possible empirical indicators

- New Congress (also party splits) → principals mutate
- Election periods → party complaints up, agenda control down

## Party complaints filed as % of all votes

# New principal and inter-semester change

	Posterior $ x_{j,t+1} - x_{j,t} $	Mean	sd
a	New Congress semesters	.140	.115
b	Rest	.108	.084
c	Prob. a>b	.560	

# Gatekeeping and signal-to-noise ratio

	Posterior $ signal_i $	Mean	sd
d	Electoral semesters	2.802	1.652
e	Rest	2.484	1.628
f	Prob. $d > e$	.565	

Posterior  $|signal_i|$  with ci off zero

g	Electoral semesters	64 %
h	Rest	46 %

# Gatekeeping and signal-to-noise ratio

	Posterior $ signal_i $	Mean	sd
d	Electoral semesters	2.802	1.652
e	Rest	2.484	1.628
f	Prob. $d > e$	.565	

Posterior  $|signal_i|$  with ci off zero

g	Electoral semesters	64 %
h	Rest	46 %

## Contingent median polarization

	mean difference		
	election		rest
	Periods I and II		
PRI-PAN	0.155	>	0.091
PRI-PRD	0.417	≈	0.413
PAN-PRD	0.262	≈	0.323
	Period III		
PRI-PAN	0.639	>	0.369

Within-contingent cohesion

## ① How do 3 instead of 2 parties affect delegation?

- Party quotas → power-sharing
- Collective principal appoints a collective agent ( $\approx$  McNollgast)
- Same in other 'autonomous' regulatory boards (telecomm, energy, education...)

## ② Unstable environment

- Principal out of business?
- Auto-pilot analogy still flies?

## ③ Age structure

- Mean at appointment 44 yrs, min 31
- Young democracies?

- ❶ How do 3 instead of 2 parties affect delegation?
  - Party quotas → power-sharing
  - Collective principal appoints a collective agent ( $\approx$  McNollgast)
  - Same in other 'autonomous' regulatory boards (telecomm, energy, education...)
- ❷ Unstable environment
  - Principal out of business?
  - Auto-pilot analogy still flies?
- ❸ Age structure
  - Mean at appointment 44 yrs, min 31
  - Young democracies?

- ① Promising routes in preliminary inspection
- ② Ideal points in IFE move considerably: Short-term shocks and long-term drift?
- ③ Movement tied to strategic considerations?

Thank you!

- ① Promising routes in preliminary inspection
- ② Ideal points in IFE move considerably: Short-term shocks and long-term drift?
- ③ Movement tied to strategic considerations?

**Thank you!**

## Approach 1—Martin&Quinn (2002):

- For **quarter**  $t$ :  $x_{j,t} \sim N(x_{j,t-1}, \text{slack})$
- *Drawback*: votes vary considerably across quarters—ideal points sensitive to sheer volume of information (Desposato), so drift may be spurious

## Approach 2—Bonica (2010):

- Allow estimates to vary over periods of very short duration: item  $i \pm k$ ,  $k = 15$
- **Vote-by-vote** estimation
- Periods mostly overlap, constraining short-term shifts
- IRT instead of OC

Table 5

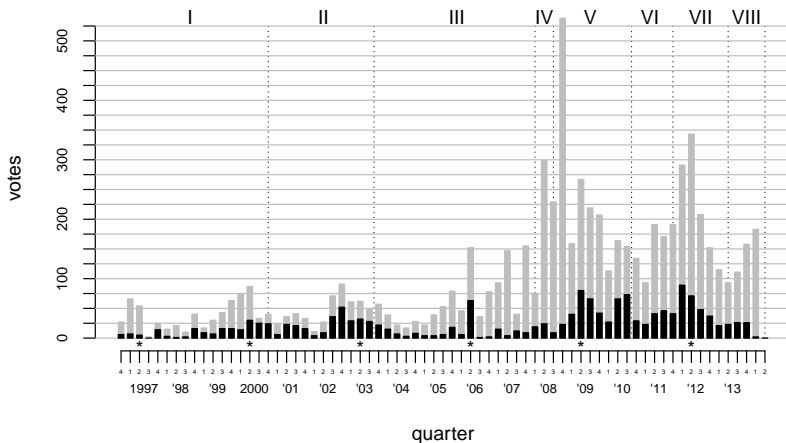

Votes used to anchor policy space for each Council

Date (vote number)	Minority vote	Substance
<b>Woldenberg I</b>		
12/16/1997 (vote 28)	PRI, Barragán (Nay)	Agenda power for President (PRI-sponsored): should Council-General ratify President's appointee for one administrative office?
11/14/2000 (vote 228)	PRI, Barragán (Aye)	Scope of IFE authority: should PAN be held responsible and fined for the case of a clergyman who campaigned illegally on its behalf?
<b>Woldenberg II</b>		
4/6/2001 (vote 27)	Cárdenas, Cantú, Luken (Nay)	Money in elections: should IFE drop investigation of complaint by Alianza Cívica against the PRI for clientelistic practices in Chiapas?
5/30/2003 (vote 206)	PRI (Aye)	Scope of IFE authority: should PAN be fined for a TV campaign spot that PRI considers libelous?
<b>Ugalde</b>		
8/23/2004 (vote 33)	PAN minus Morales, Latapí (Nay)	Agenda power for President (PRI-sponsored): should candidate for top-level appointment, proposed by Council President without relevant commission's consent, be ratified?
1/31/2005 (vote 43)	Andrade, López Flores, Morales, Gómez Alcántar (Nay)	Scope of IFE authority: must PVEM statutes make party leaders accountable to rank-and-file?

Back 

# Data = contested votes (in black)

Votes: 5,202 unanimous, 1,640 contested (24 %)

Same members within each period (I, II, ...)
